DETAILED ACTION

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 20-22, drawn to a digital camera that combines an image as it is captured with a stored image, classified in class 348, subclass 333.03.
 - II. Claims 14-19, drawn to a digital camera that combines two stored images, classified in class 348, subclass 239.
2. The inventions are distinct, each from the other because inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in a digital camera that processes stored images only and does not process its captured images. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2612

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
